PROFILE

My experience in **PHP** is about **6+ years**. My favorite framework is **Laravel** with **4+ years** of experience in it. I like working with modern stack and technologies and I mostly worked as Fullstack developer and Backend is my favorite. Having basic skills in **frontend** development helps me to do almost everything a web application or website needs.

SKILLS

- **PHP**
- **Laravel**
- **MySQL**
- **Elasticsearch**
- **Vuejs**
- **Reactjs**
- **Codeigniter**
- **REST API**
- **HTML**
- **CSS**
- **Bootstrap**
- **Javascript**
- **Jquery**
- **Git**
- Linux
- SQL
- Nginx
- Apache
- Docker
- WebApp Security
- PHP Extension Dev.
- X-Debug
- Cryptography
- Webmin / Virtualmin
- AI Machine learning
- Genetic Algorithms
- Clean Code
- …

WORK EXPERIENCE

Stonex GmbH – Full time – Fullstack Developer
Feb 2022 – Present
Stonex is a company related to precious metals. I work on the backend/frontend and the financial and transactions parts of it. It has options for managing invoices, sales and etc. I work with PHP, Laravel, Mysql, Js, Jquery, REST Api, Git,…

Rexx-systems GmbH – Full time – Fullstack Developer
Mar 2021 – Feb 2022
I worked on a web application used for HR and recruitment management. We mainly debug the existing panel and sometimes add new features. The code should be clean and follow the existing guidelines.
It should be tested extensively before being pushed.
We use PHP, MySQL, JQuery and JS for frontend, Bootstrap, Git, XDebug,…

Andishe Negar Pars – Full time – Fullstack Developer
Nov 2019 – Feb 2021
Worked on security panels like SIEM for banks and credit institutes for monitoring and managing logs that are collected from different devices and queued using Kafka to be indexed in Elastic search.
Logs are We have several different microservices that talk together using REST API. Widely used caching. Part-time until the end of university, then changed employment to fulltime.
Screenshots: Download

Used **PHP**, **Laravel**, **MySQL**, **ElasticSearch**, **Kafka**, **Redis**, **Vue.js**, PHP Extension Development (C & Zend), **Encryption**, **REST API**, Bootstrap, JQuery, HTML, CSS, JS, Git

Mimos – Remote job - Fullstack Developer
Feb 2019 – Oct 2019
A website for selling SEO courses and has a VIP subscription type.

My Personal Projects:

Kalej.de / Kalej.ir – Personal project – Fullstack Developer
Started on Jan 2016
It is used by college students **for rating professors** and downloading handbooks of each other.
Operating in countries: Germany and Iran
I have made it using **PHP**, **Laravel**, **MySQL, Redis**, HTML, CSS, Bootstrap, JQuery.
There is also a robot for Kalej site (https://t.me/kalejbot). If somebody adds it into a group, it analyzes every message and if it sees a question, answers it properly if it can.

Licencrypt.com – Personal project - Fullstack Developer
Started on May 2021 (website is offline now)
A SaaS project to encrypt any PHP source code in order to avoid copying or editing by others. I made the website using Laravel framework and the php-extension to decrypt the encrypted scripts at runtime using C language and zend functions. It is similar to **ioncube** and **sourceguardian**.

Freelancing experience:

Dribble App – Freelance - Backend Developer
Oct 2019 – Nov 2019
I made the initial REST API for the android app for betting on soccer events.

Maadticket – Freelance - Backend Developer
Oct 2018 – Feb 2019
Just like the previous one but only the backend side.

IRConcert – Freelance – Fullstack Developer
Mar 2018 – Aug 2018
Selling concert tickets online site that has different panels for admins, producers and sell agencies.

DropRecycle – Part time Contract – Backend Developer
Aug 2018 – Oct 2018
I created the Rest-API for their Android/IOS application.

EDUCATION

Tehran South Azad University
2014 – 2019
Bachelor's degree of Electrical and Electronics Engineering. Experienced IOT and microchip programming.
