I'm a FullStake Developer with +4 years Experience specializing in Php, laravel, React, Mysql, Flutter, Redux, material ui, and Html css.
I have the ability to do difficult tasks both as a team and as an individual, and learning to learn new challenging things. According to the experiences that I have gained in these years, I am interested in working in different fields of design and development in the field of developing and programming. I have developed a work plan for myself in this field. I am my job and I like to enjoy my work and do it with passion to do it in the best possible way.
In addition to these courses and documents and work records, there were other small things that were not mentioned in this resume.
